* For a quantity of 10 off units
DisposaGlide is, on average across the product size range,
up to 25% less than our nearest Competitor's Patient Specific Slidesheets

Prices
Start From Only
£2.15/sheet

Following extensive development Quintal is now pleased to introduce the **most competitive, fabric, patient specific slidesheets available in the UK today - the DisposaGlide™**

DisposaGlide™ is **Soft & Quiet** to the touch, but is incredibly strong, has high performance, and all at an extremely low cost. Available in 8 sizes of tubular, and 3 sizes of flatsheet, the **DisposaGlide™** range of patient specific/disposable slidesheets provides a solution to all of your patient handling requirements.

The **DisposaGlide™** slide sheets are manufactured from a specially designed, silicon coated, technical fabric. They are soft and quiet in use and are extremely cost effective. The 60 gsm polyester material provides high strength for extra durability, and exhibits superb slip characteristics for smooth, easy patient transfers in all directions. Bright Yellow in colour, the **DisposaGlide™** ensures that any contamination that may occur during use, will be easily identified. This in itself helps prevent any cross infection issues.

DisposaGlide™ Single Patient Use Slide Sheets are individually packed in their own plastic bag to ensure they are kept clean and ready for use with a single patient. If it is still in its unopened bag, its ready for use with the next patient. No concerns about whether or not it has been used previously with another patient.

Also available is the **PatPAQ™** clear drawstring bag. This extremely useful additional option enables the slide sheets to be stored in the patients own clear bag. The Ward details and the Patients Name can be written onto the bag to ensure there is no confusion as to whom the slidesheets are being used with. The draw string allows the **PatPAQ™** to be hung on the side of the patients bed, ready for use.

During general ward use **DisposaGlide™** Single Patient Use Slide Sheets can be used with the same patient for several weeks and may be wiped down, if needed, and then disposed of, appropriately, after use.

DisposaGlide™ is perfect for use in both lateral transfers or patient positioning, it assists with infection control and all at an incredibly low cost.

DisposaGlide's unique features ensure they are ideally suited for use in Hospitals, Care Homes and by the Emergency Services.
