

## **2010 Price List**

Product Code	Description	Image	UK Price
<b>Q2Board-Q2G</b>	Lightweight, compact, high strength Q2 curved transfer board that facilitates most patient seated transfers with 99.9% of the population, it has a working load limit up to 285kg (44 stone) and an in built anti-microbial agent that helps combat surface growth of harmful organisms such as MRSA etc <b>Size - 750mm x 338mm x 12mm thick</b>		£43.20
<b>Q2GF01</b>	Ultra low friction glidesheet attachment for Q2 Boards specially designed to make seated transfers with either larger patients or where the patient's bare skin is exposed, i.e. during a toilet transfer, much easier to perform <b>Priced per pack of 10 units</b>		£80.10
<b>Q2CS01</b>	Q2 Carry Strap suitable for use with Q2 Board. Has quick release snap fasteners for easy attachment & removal		£5.40
<b>Q1Board</b>	Compact Q1 curved seated transfer board, based on the same unique shape of the Q2 board, is ideal for paediatric patients or where a smaller board is required. Has a working load limit of 175 kg (27 stone) <b>Size - 620mm x 260mm x 10mm thick</b>		£36.00
<b>QET01</b>	The ET straight transfer board has curved ends for easy placement and is ideal for use in restricted areas or where size is an important issue, has a working load limit of 175kg (27 stone) <b>Size - 600mm x 220 x10mm thick</b>		£36.00
<b>QBB01</b>	The original banana board With a working load limit of 145kg (23 stone) <b>Size - 730mm x 345mm x 10mm thick</b>		£48.60
<b>QFG01</b>	The Quintal FlexiGlide is designed to assist in the movement of patients where obstructions need to be overcome. It is not designed to bridge gaps greater than 25mm but its flexible shape allows it to be used in awkward areas. <b>Size - 600mm x 260mm x 3mm thick</b>		£32.40
<b>QProLateral</b>	QProLateral is designed to match the contours of profiling beds and allows either lateral transfers of patients in a semi sat up position, particularly important with patients with breathing difficulties, or can also be used completely flat similar to a Patslide <b>Size - 1500mm x 740mm x 4.5mm thick</b>		£130.50
<b>QProLat-AET</b>	AET version of the standard QProLateral that has the same characteristics but is narrower in width with larger curved ends and is specifically designed for use in the accident, emergency and theatre environments <b>Size - 1500mm x 590mm x 4.5mm thick</b>		£112.50
<b>QLATSLIDE</b>	QLatslide is designed as a replacement for the original Patslide and is used for patient transfers where the patient is transferred from one surface to another completely flat <b>Size - 1500 x 740mm x 4.5mm thick</b>		£130.50
<b>QGFS90180LH6</b>	Specially designed long handled flat sheet with extra long QGrip handles for use with the QProLateral or QLatslide patient transfer boards <b>Size - 90 x 180cm</b>		£17.06

<b>AirPal RAMP Air Assisted Airway Management &amp; Positioning Lateral Transfer Devices</b>			<b>Price</b>
<b>Designation</b>	<b>Description</b>	<b>Style</b>	
<b>028N-RAMP</b>	The AirPal® RAMP® combines our market leading lateral patient transfer and positioning device (The Air-Pal® Platform), with a fully adjustable patient positioning surface to create proper patient positioning for direct laryngoscopy, intubation and Airway Management.		£3,753.00
<b>028NSH-RAMP</b>	A stand alone version of the standard AirPal RAMP has no air platform only the patient positioning surfaces. Particularly useful for Obstetrics and gynae use.	<b>IMAGE COMING SOON</b>	£1,758.00
<b>505899-2</b>	The RAMP® system utilizes hospital supplied air or nitrogen as an inflation source (an AirPal Air Supply is used separately for transfer). The RAMP® Air Controller is directly connected to the hospital's air supply and then controls inflation of the two air chambers via dial selector and the attached air supply hoses. A "push button" located on the underside of the AirPal® Air Controller regulates the flow of air for inflation purposes. A second "push button" located on the top of the AirPal® Air Controller regulates the escape of air from the RAMP®. The Air Controller protects from over inflation with self resetting blow off valves located within the body of the Air Controller.		£1,093.00
<b>AS1200</b>	220/240V 1200W Air Power supply Noise Level- 66db -one meter with an ambient noise level of 35db. Weight- 5.4Kg (12lbs) Supply Hose- 6ft. Standard/25ft Extended Length available at extra cost Electrical Plug- Three prong grounded "Hospital Grade" Dimensions- 11" x 9" (diameter x height) Materials- Filter housing = stainless steel; Motor enclosure = plastic		£855.00
<b>700-1</b>	Stand with single basket and single hoop. (Equipment Not Included)		£428.00
