2010 Price List

Product Code	Description	Image	UK Price
Q2Board-Q2S	Lightweight, compact, high strength Q2 curved transfer board that facilitates most patient seated transfers with 99.9% of the population, it has a working load limit up to 285kg (44 stone) Size - 750mm x 338mm x 12mm thick		£48.00
Q2GF01	Ultra low friction glidesheet attachment for Q2 Boards specially designed to make seated transfers with either larger patients or where the patient's bare skin is exposed, i.e. during a toilet transfer, much easier to perform Priced each but only available in packs of 10 units		£8.90
Q2CS01	Q2 Carry Strap suitable for use with Q2 Board. Has quick release snap fasteners for easy attachment & removal		£6.00
Q1Board	Compact Q1 curved seated transfer board, based on the same unique shape of the Q2 board, is ideal for paediatric patients or where a smaller board is required. Has a working load limit of 175 kg (27 stone) Size - 620mm x 260mm x 10mm thick		£40.00
QET01	The ET straight transfer board has curved ends for easy placement and is ideal for use in restricted areas or where size is an important issue, has a working load limit of 175kg (27 stone) Size - 600mm x 220 x 10mm thick		£40.00
QBB01	The original banana board With a working load limit of 145kg (23 stone) Size - 730mm x 345mm x 10mm thick		£54.00
QFG01	The Quintal FlexiGlide is designed to assist in the movement of patients where obstructions need to be overcome. It is not designed to bridge gaps greater than 25mm but its flexible shape allows it to be used in awkward areas. Size - 600mm x 260mm x 3mm thick		£36.00
QProLateral	QProLateral is designed to match the contours of profiling beds and allows either lateral transfers of patients in a semi sat up position, particularly important with patients with breathing difficulties, or can also be used completely flat similar to a Patslide Size - 1500mm x 740mm x 4.5mm thick		£145.00
QProLat-AET	AET version of the standard QProLateral that has the same characteristics but is narrower in width with larger curved ends and is specifically designed for use in the accident, emergency and theatre environments Size - 1500mm x 590mm x 4.5mm thick		£125.00
QLATSLIDE	QLatslide is designed as a replacement for the original Patslide and is used for patient transfers where the patient is transferred from one surface to another completely flat Size - 1500 x 740mm x 4.5mm thick		£145.00
QGFS90180LH6	Specially designed long handled flat sheet with extra long QGrip handles for use with the QProLateral or QLatslide patient transfer boards Size - 90 x 180cm		£18.95

018SN 024SN 028SN 030SN 032SN 039SN 050SN	Additional Sani Liners for use with the relevant AirPal Platform. Units are attached to the Platform by means of Non Corrosive metal snap fasteners. The lack of use of "Velcro" assists greatly with Infection Control.		£95.00

AirPal RAMP Air Assisted Airway Management & Positioning Lateral Transfer Devices			Price
Designation	Description	Style	
028N-RAMP	The AirPal® RAMP® combines our market leading lateral patient transfer and positioning device (The Air-Pal® Platform), with a fully adjustable patient positioning surface to create proper patient positioning for direct laryngoscopy, intubation and Airway Management.		£3,950
028NSH-RAMP	A stand alone version of the standard AirPal RAMP has no air platform only the patient positioning surfaces. Particularly useful for Obstetrics and gynae use.	IMAGE COMING SOON	£1,850
505899-2	The RAMP® system utilizes hospital supplied air or nitrogen as an inflation source (an AirPal Air Supply is used separately for transfer). The RAMP® Air Controller is directly connected to the hospital's air supply and then controls inflation of the two air chambers via dial selector and the attached air supply hoses. A "push button" located on the underside of the AirPal® Air Controller regulates the flow of air for inflation purposes. A second "push button" located on the top of the AirPal® Air Controller regulates the escape of air from the RAMP®. The Air Controller protects from over inflation with self resetting blow off valves located within the body of the Air Controller.		£1,150
AS1200	220/240V 1200W Air Power supply Noise Level- 66db -one meter with an ambient noise level of 35db. Weight- 5.4Kg (12lbs) Supply Hose- 6ft. Standard/25ft Extended Length available at extra cost Electrical Plug- Three prong grounded "Hospital Grade" Dimensions- 11" x 9" (diameter x height) Materials- Filter housing = stainless steel; Motor enclosure = plastic		£900
700-1	Stand with single basket and single hoop. (Equipment Not Included)		£450
