Durable

Disposable Glidesheets
on a roll

Following on from the success of the original SoloGlide product, Quintal Healthcare has now refined and improved the SoloGlide product and is pleased to announce **SoloGlide III**

SoloGlide III is **Softer & Quieter** to the touch. It still retains its high strength and excellent slip characteristics, but it is now also **the lowest cost Disposable Slide Sheet available in the UK today.**

Available in 3 sizes of Tubular and 2 sizes of Flatsheet. No matter what configuration or size of SoloGlide slide sheets you require they are all delivered perforated on a roll, ready to tear off and use .

SoloGlide glidesheets are manufactured from a specially formulated, hybrid polymer, triple layer substrate.

Designed to provide high strength for extra durability, they also exhibit superb slip characteristics for smooth, easy patient transfers.

Available as Flatsheets or Tubular format for easy use in either lateral transfers or patient positioning.

In Flatsheet format the sheets can either be folded in half or if full body length size is required two can be used together with their yellow surfaces face to face for maximum slip. Unlike some other disposable slide sheets SoloGlide slide sheets can withstand liquids coming into contact with them and can therefore be wiped down to ensure SoloGlide lasts longer life in patient specific applications.

An optional wall mounted polypropylene dispenser is available that keeps the SoloGlide reel clean and allows the individual SoloGlide sheets to be removed from the reel quickly and easily. A slide sheet usage window is situated on both ends of the dispenser to make it easy to see when a reel needs replacing. When all sheets are exhausted simply remove the empty reel and drop in a new one.

** SoloGlide reels are now delivered singularly in their own protective carton. The new purpose designed, wall mountable SoloGlide Reels Dispenser is available as an optional extra.

* The price shown is a single sheet price, as shown overleaf. SoloGlide, however, can only be purchased on a roll. The actual quantity of individual SoloGlide sheets on the roll depends upon the particular size of the individual SoloGlide sheets

SoloGlide's unique features ensure they are ideally suited for use in Care Homes, Hospitals and by the Emergency Services.
